

Brazilian Supreme Labor Court - TST

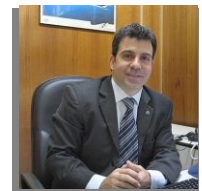

General information

The function of the Brazilian Supreme Labor Court is to conciliate and to judge individual and collective workers' agreements celebrated between employers and employees and, according to law, any other controversies arising from labor relations, as well as litigations whose origin lies in the fulfillment of its own sentences, including collective ones. Therefore, all that is related to conflicts between employers and employees, both in the individual or the collective spectrum, resulting from labor relations is under the jurisdiction of the Labor Court.

Client's needs

- Mapping of processes in order to identify the stages structuring the Court Information System, as well as any other failure points that may completely or partially compromise the system;
- Assessment of additional services provided, such as queries available on the Court's website and other services made available to lawyers;
- Assessment of all related databases, middleware components, server redundancy, automatic publication systems linked to the national press and e-mail push systems for registered parties in lawsuits;
- Assessment of all assets involved in the creation and recovery of backup copies, all security systems like firewalls and DMZ, and others;
- Assessment of all physical assets, such as network switches, cables and electric energy systems;
- Assessment of software infrastructure.

“Modulo is widely renowned and experienced in the Information Security industry. Modulo Risk Manager™ consolidates and makes available a lot of the intelligence acquired by the Company along the past years. The PESI methodology also reflects one of the company's competitive advantages, demonstrating maturity, experience, and professionalism. Modulo Risk Manager is an important instrument in managing information security, risks, and in IT management in general. This is the first experience our Supreme Labor Court has had with tools such as this one. I can say it has been a very successful one.”

Luiz Antonio Garcia
Technical Support Services Director
Brazilian Supreme Labor Court
